SRV
Ft Meade
23 JUL 87

SUBJECT: SRV report for week of 20 JUL - 23 JUL, 1987

1. Early sessions brought out a scene of people and equipment lined up on barren ground. This did not change throughout the sessions.
2. Early sessions indicated military vehicles, OD green in color, but the people were wearing 1) solid dark blue clothes (AOL: like an Air Force uniform) and 2) dark blue trousers w/light blue shirt (AOL: like a blue dress shirt). The ground was perceived as bare gravel only.
3. Later sessions (trying to get more data on the equipment) indicated that the entire scene was side lit by a point source of light, and very strange looking, due to the lighting. The ground was perceived as looking like coffee-grounds in both color and texture. The impression was very strong that the scene might be under water. The people were seen dressed then in 1) solid blue and 2) dark/light blue wet suits. The machines were perceived as being light/dark green, and tubular in structure.
4. Viewer's critique. Impressions which remained constant, and have a feel of dependability about them are:
men & machines in some relationship
different people dressed differently
respective colors and textures
